

INNOVATION DELIVERING EXCELLENCE

Paragon consistently provides client-centric, customized program management, information technology, and logistics services to organizations of all sizes in every arena, helping them to manage processes, and optimize their operations. Our mission is to deliver superior services and support to our clients while fostering a climate of innovation and customer return on investment with integrity, commitment and excellence in all that we do. We succeed when you do.

CORE SERVICE COMPETENCIES

LIFECYCLE SUPPORT

- » Program / Portfolio Mgmt
- » Enterprise Architecture
- » Systems Engineering
- » Financial / Cost Management
- » Acquisition Support
- » Test / Evaluation
- » Configuration Management
- » Integrated Governance

CYBERSECURITY

- » Penetration Testing
- » Vulnerability Management
- » Security Awareness
- » Information Security
- » Information Assurance
- » Risk Management
- » Disaster Recovery Planning

FINANCIAL SERVICES

- » Earned Value Management
- » Program Financial Mgmt
- » Acquisition Planning
- » Cost Estimation
- » Strategic Planning
- » Balanced Scorecard
- » Resource Management

CORPORATE DATA

- Center for Verification and Evaluation (CVE) Verified Veteran-Owned Small Business
- Capability Maturity Model Integration (CMMI) Level 2 - Services Appraised
- Federal Risk Authorization Management Program Third Party Assessment Organization (3PAO)
- ISO 9001:2015 Certified as a quality management system based on a number of quality management principles

NAICS CODES

541519	541512	541611	541690
541330	541513	541614	541711

	CLIENT	WORK PERFORMED
	U.S. TRANSPORTATION COMMAND (USTRANSCOM) – PROGRAM EXECUTIVE OFFICE SUPPORT (PEO-T)	Integrated enterprise acquisition Program Management for multiple programs in various stages of the SDLC, all in a Performance-based environment. Services include: Program/Project Management, Financial/Cost Management, Systems Requirements Elicitation and Management, Systems Engineering, Cybersecurity, Testing, Validation, Configuration Management, and Process Improvement.
	AIR MOBILITY COMMAND (HQ AMC) DIRECTORATE OF COMMUNICATIONS (A6) INFORMATION TECHNOLOGY INTEGRATED PROGRAM SUPPORT (ITIPS)	Support for Mobility Air Forces CIO's C2, business systems, and information technology projects. We provide technical and subject matter expertise to advise and assist the Government with program and project management, Program and Acquisition Lifecycle, Quality Assurance, Document Control, and Engineering services
	DEPARTMENT OF TREASURY, INTERNAL REVENUE SERVICE CHIEF TECHNOLOGY OFFICER (CTO) VULNERABILITY MANAGEMENT AND TOOL SUPPORT	Support for Vulnerability Assessments and Penetration Tests (VAPT) on IRS systems, networks, architectures, infrastructures, and assets. Testing reduces risk by scanning and analyzing servers, networking infrastructure, databases, and applications to identify security vulnerabilities and identify corrective actions to reduce and mitigate the risk of consequences from adverse actions.
	FEDRAMP THIRD PARTY ASSESSMENT ORGANIZATION (3PAO) SUPPORT	Certified assistance to help cloud service providers (CSPs) and Government agencies meet strict FedRAMP compliance. We evaluate CSPs' systems to ensure transparency between government and cloud providers and consistency in data security strategies. Our information assurance competence includes experience with Federal Information Security Management Act (FISMA) and testing security controls.
	DISTRIBUTION POLICY AND PROGRAM MANAGEMENT SUPPORT SERVICES FOR U.S. MARINE CORPS LOGISTICS DISTRIBUTION POLICY BRANCH	Data collection, information analysis, document preparation, and USMC Subject Matter Expertise. We provide policy and procedures for sustainment distribution including freight and logistics interfaces; household goods; passenger travel; Second Destination Transportation (SDT); unit movement and packaging, packing and preservation; and IT portfolio management, and system certification.
	USTRANSCOM CYBER SYSTEMS TESTING AND CONTROL LABORATORY SUPPORT AND ADMINISTRATION	Support USTRANSCOM's Enterprise Integration Lab (EIL), with secure, state-of-the-art software development, test, and IT production environments focused on expedient delivery of IT solutions to address joint deployment and distribution challenges. We provide computing system administration for four computing environments, configuration management, integration testing, assistance to operate the environments, and systems analysis of current and future IT systems.
	FINANCIAL IMPROVEMENT AND AUDIT READINESS ("FIAR") SUPPORT TO THE ASSISTANT SECRETARY OF THE AIR FORCE, FINANCIAL MANAGEMENT AND COMPTROLLER	Supports the Air Force by ensuring common audit-readiness strategies are in place, common practices are followed, common products are being working in synchronized schedules, and common reporting tools/products are being utilized. We also obtain assertion documents necessary for audit readiness in support of the OSD Transportation Integrated Process Team (IPT) requirements.
	NASA TECHNOLOGY SUPPORT SERVICES II (ITSSII) AT KENNEDY SPACE CENTER (KSC)	IT Projects design and implementation. We provided software design and development including research of new technologies and designing database architectures, storage, and networks, ensuring consistent uptime for NASA. We scheduled development and system administration activities and performed extensive ongoing research on feasibility and IT Security implications of Wearable Technology in the NASA enterprise environment and validated NASA System Security Plans.
	USTRANSCOM JOINT ENABLING CAPABILITIES COMMAND (JECC) COMMAND, CONTROL, COMMUNICATIONS, CYBER, AND COLLABORATION SUPPORT (C5S)	We provide a broad range of IT support for JECC missions to include: cyber defense, network operations and maintenance, Communications Security (COMSEC), deployment support, IT planning, system integration, technical testing and evaluation, analysis and guidance, software management, systems administration, hardware repair and enhancements, software configuration, end user devices support, architecture and infrastructure management, system management, audio visual and video teleconferencing, and Contingency of Operations (COOP) sustainment.
